How healthy is the air quality in our region? HARC's mobile lab will hit the streets again as a part of an upcoming study. Please READ MORE in this month's blog.

HARC HEADLINES

Join us: Upcoming CHP Webinar
Wastewater treatment plants are increasingly concerned with power resilience for continuity of operations during outages that can occur
with storm events or other causes. On March 4, 2020, at 10 a.m. CST, join the US DOE's Southcentral CHP Technical Assistance Partnership to learn how CHP can support energy savings and resilience goals for your Wastewater Treatment Plant.

Join us: Ten Across Water Summit
HARC is proud to sponsor the third annual Ten Across Water Summit in Houston, Texas, March 23-25, 2020. The Ten Across (10X) initiative frames the US Interstate 10 corridor as the most compelling window on the future of the country, one which presents the challenges of the 21st century in the highest relief.

HARC is Hiring
HARC is a collaborative workplace of smart and skilled people who are excited about what they do and are looking forward to what they will accomplish in the future. We are currently seeking a Program Director to lead our new program area, Climate Risk. [APPLY ONLINE]

HARC Partners to Host Upcoming Workshop
Co-hosted by the Harris County Flood Control District, the Texas Riparian Association, Texas A&M AgriLife, Texas Water Resources Institute, and HARC, the April 1 training will focus on natural design processes for stream restoration projects. The training will begin at 8:30 a.m., end at 4 p.m., and will take place on HARC's campus.

Register today: Gulf Coast Water Conservation Symposium
Join us on Tuesday, April 21, 2020, from 8 a.m. until 3:30 p.m. at the United Way of Greater Houston. The Gulf Coast Water Conservation Symposium provides the information needed to implement successful water conservation programs, effectively engage communities, and plan for the future of water in our region.

Join Us: Texas Resilience Summit
HARC staff will present and participate in the upcoming summit on May 20 - May 21 in Austin, TX. This program provides a platform for Texas communities and organizations to come together and share experiences, opportunities, tools, resources, and knowledge to build a more resilient Texas.
HARC Recently Hosted Climate Change Workshop
On February 10, 2020, HARC research staff and community leaders gathered for an interactive workshop. The En-ROADS Climate Workshop helps build support for strategies to address climate change via interactive testing of the cutting-edge simulation model En-ROADS. The resulting experience is hopeful, scientifically grounded, action-oriented, and eye-opening.

FEBRUARY BLOG
Assessing Air Quality in Harris County and Future Endeavors
Upgrades to technology and rapid deployment capabilities enhance the mobile lab’s reach.

By: Dr. Mustapha Beydoun, COO

HARC's Program of Work
Research hub. Community resource. Living lab. HARC provides a variety of resources for communities, companies, and people. We are focused on building a sustainable future that helps people thrive and nature flourish.

[CLICK HERE] to review our core research areas.

HARC IN THE FIELD
Over the last month, HARC researchers Dr. Stephanie Glenn, Dr. Erin Kinney, McKenzie Roberts, and Andra Wilcox held field days across the region to study rapid assessment methods for trash and litter identification along waterways. Through this process, the team examined several different field plot methods for identifying and surveying litter. For more information on this project, please CLICK HERE.
